

CANCER REGISTRY SERVICES PRECYSE ONCOLOGY DATA MANAGEMENT

We spark true innovation with Oncology Data Management (ODM) and Cancer Registry Services. Our industry-leading approach delivers productivity and quality that transcend oncology program challenges and transform Cancer Registry workflows to consistently exceed industry standards.

At the center of Precyse ODM Services is a proven team of Certified Tumor Registrars (CTRs) and ODM technicians. Precyse CTRs can assist a healthcare organization's Cancer Program to achieve and maintain full compliance with the Commission on Cancer (CoC), National Accreditation Program for Breast Centers (NAPBC), the North American Association of Central Cancer Registries (NAACCR) and state and SEER reporting standards. Precyse ODM Services are available on a long- or short-term basis, serving large health systems, academic and community-based hospitals, central cancer registries and clinical research organizations. The Precyse team of CTRs

Precyse solves complex oncology data collection issues with robust and responsive solutions for Cancer Programs and Cancer Registries.

and ODM technicians is the largest, most qualified ODM team in the industry. They have close to 1,000 years of combined cancer data management experience and a 100% American College of Surgeons (ACoS) survey success rate, abstracting more than 35,000 cases annually.

Precyse delivers complete strategic sourcing, removing an organization's responsibility for management, staffing, daily operations, workflow and compliance, as well as providing interim management

through expert staff to manage administration and daily Cancer Registry/reporting functions. From backlog abstracting, operational assessments and data collection to interim management, training, education and ACoS pre-survey assessments, we develop a true partnership with our Oncology Service Line Administrators and Cancer Registry clients to deliver consistent, quality and cost-effective oncology services and outcomes reporting.

CANCER REGISTRY SERVICES: PRECYSE ONCOLOGY DATA MANAGEMENT

FEATURES AND BENEFITS

- Specialized CoC program management, pre-survey readiness surveys, cancer program and registry operational assessments, CoC survey preparation and new CoC program implementation (transitioning state reporting to CoC-approved programs).
- Experts in annual report writing, preparation of statistical analysis and outcomes reporting, data quality and compliance audits, Central Cancer Registry case consolidation and edit correction, survey preparation, registry system networking, staff training and education.
- Timely, complete, accurate and proven oncology abstracting services and data collection services for clinical trials, trauma and disease registries and bone marrow transplant programs provided on a long- and short-term basis, delivered on-site or remotely.
- The largest team of CTRs in the nation, with many local resources and flexible schedules to meet client needs.
- Credentialed colleagues with extensive experience in Cancer Registry Services who undergo rigorous recruitment exams, ongoing quality reviews and reference and background checks.
- Quality of output is reviewed continuously, and the Precyse team consistently meets or exceeds 95% accuracy.
- Robust eLearning and monthly in-service programs. Support for attendance at annual industry education conferences.
- Internally developed ODM best practices, professional support network and process sharing across all Precyse clients.

RESULTS

- Enhance data quality, leading to improved operations and efficiencies for your cancer program.
- Eliminate abstracting and processing backlogs to provide enhanced clinical decision support.
- Improve clinical staff satisfaction with oncology data quality and reporting timeliness.
- Guarantee a level of consistent performance that exceeds the current market standards in Cancer Registry Services.
- Maintain compliance with CoC, State, NAACCR and SEER standards – 100% CoC survey success rate.
- Provide timely, flexible, complete and accurate Cancer Registry Abstracting Services.

SUCCESS STORY

“I work very closely with Precyse. I like having someone on-site I can work with. It makes a real difference to our program.”

Kate Sweeney, Manager, Cancer Center Patient Support Services

FROEDTERT & THE MEDICAL COLLEGE OF WISCONSIN – A LASTING COLLABORATION

As Froedtert & the Medical College of Wisconsin health network grew, the need to consolidate cancer registries at its various locations became apparent. In 2012, a decision was made to partner with Precyse for oncology data management services to consistently track and report cancer data from all network locations. Froedtert chose Precyse because of its experience with large academic medical centers, quality colleagues and robust quality assurance practices.

John Koenig, Director, Froedtert & the Medical College Cancer Network, and Director, Radiation Oncology, reports that Precyse has done a great job helping with the consolidation of the various sites, educating the staff and helping Froedtert receive Commission on Cancer accreditation.

Koenig is especially pleased with Precyse’s quality assurance, which supports the integrity of the data. Information is reviewed, validated and often double checked until everyone is satisfied. Like other academic medical centers, Froedtert & the Medical College uses the data for reference, research, to look retrospectively at treatment and validate its program. Froedtert also measures itself against both state and national guidelines.
