

CODING

Accurate and efficient coding is crucial to your organization's ability to meet financial and compliance goals. Backlogs, miscoding, high coder turnover rates and imminent changes with the ICD-10 transition represent significant challenges. That's where Precyse comes in. With a comprehensive range of proven, field-tested coding services, we deliver outstanding code quality and accuracy. Supported by ongoing credentialing, training and education, our team is recognized for its consistently demonstrated results.

Whether our medical coders work on-site or off-site, their knowledge and training is second to none; they know the latest changes in coding regulations and the specialized coding needed for the

newest clinical services. They have vast experience with coding thousands of patient records and are experts in all types of inpatient, outpatient and professional fee coding. And they are supported by precyseCode™, the most comprehensive, intelligent coding workflow and collaboration software platform on the market today.

Support from the most experienced coders in the industry and the most advanced coding technology platform available.

When you create a coding partnership with Precyse and transform complex coding workflows into productive operations, you position your department to add noticeable

value to overall hospital operations. By bringing together coders, physicians and CDI specialists on a powerful technology platform, Precyse allows you to support improved care delivery, drive business results and accelerate your revenue cycle like never before.

precyse™

Sparking innovation in healthcare information™

FEATURES AND BENEFITS

- Integrated solutions and expert services comprise Precyse's innovative, holistic approach.
- Full range of coding outsourcing services available on-site or off-site.
- Top-ranked coding workflow management professionals integrated with coding consultants and breakthrough technology.
- Rigorous recruitment exams, credentialing and reference and background checks for all Precyse coders.
- Supported by precyseCode™, the most advanced, proven ICD-10-ready Natural Language Comprehension™ coding solution on the market.
- Ongoing coder credentialing, training and education offered by Precyse University. Customized educational and training programs are also available.
- Expert responses to specific technical coding inquiries available 24 hours a day, 7 days a week, with the Precyse Assist Coding Hotline and Helpdesk.
- Cross-country client support is available with Precyse's national reach.

RESULTS

- Produce high-quality code assignments with an emphasis on accuracy.
- Streamline coding operations and scale coding resources as needed.
- Improve CMI, cash flow and DRG-based revenue.
- Reduce DNFB/DNFC levels.
- Increase productivity 20-50% with precyseCode Natural Language Comprehension™ and intelligent workflow.
- Ease coder recruiting and retention challenges.
- Identify gaps in policies, procedures and industry best practice guidelines.
- Create positive impact on physician/patient encounters with minimal impact to workflow patterns and habits of physicians.
- Reduce lost reimbursements, coding backlogs and non-compliance risk.
- Enhance regulatory compliance and improve the quality of documentation specificity in preparation for ICD-10.
- Improve results of internal and external audits.
- Reduce coding-related claim denials.

SUCCESS STORY

“Our coding process needed to help the hospital improve revenue cycle while maintaining a sound and defensible record of care.”

Karen Lawler, Director of HIM and Privacy Officer,
Stamford Hospital, CT

STAMFORD HOSPITAL: SEAMLESS PARTNERSHIP MAKES THE DIFFERENCE.

In 2006, the HIM department of Stamford Hospital was feeling the effects of not having a defined and sustained coding productivity and quality model. Symptoms included unsatisfactory DNFB numbers and increasing dissatisfaction among medical staff with clinical data processes and workflow. With no internal HIM Director in place at the time, Stamford decided to partner with Precyse to help lead the Stamford coding team to better performance and the hospital to better financial results.

The Precyse team drove a 53% improvement in documentation and coding metrics in the first year of the relationship. Turnaround time to process patient records from receipt through finalization and coding improved 33%. Turnaround time for billing requests post-code submission decreased from weeks to hours, enabling a 25% reduction of days on hold for inpatient accounts.
