

EDUCATION

The unstoppable mandate for EHRs and improved workflow is elevating education to a new level of importance, if not urgency. Hospitals must recruit, educate and develop qualified professionals to facilitate the transition to ICD-10 and Clinical Documentation Improvement initiatives. Through Precyse University, we provide a comprehensive array of training programs and services targeted to healthcare professionals in medical coding and billing, clinical documentation, medical transcription and health information management, as well as to doctors, nurses and other medical staff members.

Our suite of customizable knowledge and skill assessments, evaluations, training and mentoring courses calibrate to a variety of knowledge and skill levels, from beginners to experienced professionals seeking advanced training. We can tailor our education programs to fit the specific needs of an individual,

Robust, one-of-a-kind education and training delivered on-site or online to enhance the knowledge and expertise of your staff.

team or department. Post-testing helps track progress and accomplishments and also recognizes where additional training and mentoring may be beneficial. Other Precyse University services include interactive labs and games, anatomical and procedural computer animations and pre-employment testing.

The Impact of ICD-10

Precyse University offers a leading-edge, customized education solution to prepare your organization for ICD-10 compliance. The Precyse University ICD-10 certification program is a revolutionary education solution

that provides customized education to each of the ICD-10 impacted populations within your organization. From coders to physicians to case managers to nurses to administrative staff, our ICD-10 education program will prepare your facility for this transition and position you for productivity and success on day one.

Sparking innovation in healthcare information™

FEATURES AND BENEFITS

- Comprehensive education and training services include:
 - Industry's most comprehensive ICD-10 education
 - eLearning, interactive webinars and on-site education
 - Online labs and educational games
 - Assessments, personalized CEU tracking and management
 - A full library of educational resources
 - Leading-edge computer animations
- Tailored education impacts populations that require training in ICD-10 classification systems.
- Customized and comprehensive facility- or system-wide ICD-10 learning plan, combining data from audit results, surveys, interviews and our ICD-10 Coding Readiness Assessment.
- Complete ICD-10 education—today through post-transition.
- The Precyse University Learning System—an online education and learning management platform.
- Education and training services are available on-site or via the web, 24 hours a day, 7 days a week.
- Flexible education delivery system custom-tailored for your needs.
- Baseline assessments evaluate staff skill levels and knowledge base as well as specific problems and issues within HIM workflows.
- Education services encompass every function of HIM and clinical best practice knowledge.
- On-site Precyse educators are experts in their field and all are multi-credentialed.

RESULTS

- Complexities of ICD-10 can be learned while maintaining current workflows and responsibilities.
- Successfully manage the transition to ICD-10 and mitigate its potential costs.
- HIM staff members improve critical skills, expand knowledge and gain an understanding of how their function affects workflow.
- Stay abreast of changes in government regulations, coding updates and medical and surgical innovations that affect HIM functions.
- Improve staff morale.
- Reduce denials and rejections related to coding or documentation.
- Reduce staff turnover.
- Build confidence and skills among new coders or non-credentialed coders.
- Track educational progress and skill improvement.
- Enhance regulatory compliance and audit performance.
- Improve hospital and physician profiling and scorecard data.
- Improve CMI accuracy.
- Increase the speed of your revenue cycle.

SUCCESS STORY

"The training and education available through Precyse University is a well-thought-out, solid resource that is available to us any time of day. I know it will help us to prepare for forthcoming issues in the healthcare arena."

Karen Lawler, Director of HIM and Privacy Officer,
Stamford Hospital, CT

PRECYSE UNIVERSITY: HELPING CODERS MAKE THE GRADE.

Before Stamford Hospital began outsourcing its coding function to Precyse, a major management concern was that no formal training program was in place for the hospital's coding staff. However, training concerns abated when Stamford's revenue cycle team and clinical documentation specialists began accessing the Precyse University learning system. That educational partnership was the first step in the collaborative team approach of Stamford's scalable outsourcing relationship with Precyse.

As Precyse's relationship with Stamford grew, both Stamford coding staff and Precyse coding professionals assigned to Stamford began collaborating on which education courses to access. Because a Precyse coding manager works directly on-site with the hospital's record maintenance team and IT staff, Stamford facilitates Precyse educational services and Precyse University eLearning courses to specific needs of the extended Stamford coding team.
