

TRANSCRIPTION TECHNOLOGY & SERVICES

Precyse combines the most advanced technologies with top-notch experts to transform the patient narrative into meaningful health information—while allowing you to reach your financial goals. In the midst of an industry that is faced with ever-increasing health information management costs, we are committed to reducing your financial burden and positively impacting your revenue cycle by improving workflow and increasing productivity. Our transcription technology and services drive exceptional electronic documentation that better supports the data challenges you are facing today, such as ICD-10, Meaningful Use and Core Measures. Our platform and processes ensure accurate, auditable invoicing, validating our value and your savings.

Precyse has a large remote workforce of high-quality and experienced medical transcriptionists who consistently produce documents

with 98% accuracy or above. And with 99.9% uptime, physicians experience reliable dictation and document receipt. At the heart of our transcription solution is precyseNet™, a single platform that supports both hospital-employed medical transcriptionists and editors and transcription outsourced to Precyse. PrecyseNet facilitates collaborative workflows, instantly matching your dictation and transcription needs with the pool of available skilled transcriptionists and medical editors.

Precyse continues to dominate the transcription service field in terms of quality, technology and customer service. In both 2013 and 2012, Precyse was named Best in KLAS for medical transcription service organizations (MTSOs) in the nation by KLAS, a research firm specializing in reporting the performance of healthcare vendors. In 2009, 2010 and 2011, Precyse was ranked second by KLAS.

With the most comprehensive, intelligent workflow and collaboration solution available, Precyse transforms dictation into timely, accurate, meaningful healthcare data.

precyse®

Sparking innovation in healthcare information™

TRANSCRIPTION TECHNOLOGY & SERVICES

FEATURES

- Our proven platform is easily integrated with your EHR, ensuring seamless data transfer.
- The precyseNet platform transforms and stores transcribed documents as structured, codified data that better supports computer assisted coding, Meaningful Use, Core Measures, ICD-10, data mining, clinical repository input and more.
- Front-end options easily adapt to preferred dictation styles, so clinicians do not have to modify their dictation patterns.
- Technology draws from both the individual user profiles and a database of specialty-specific vocabulary.
- Flexible solutions can be customized to meet your needs, from using the technology internally for your employees, to full outsourcing, to real-time editing by the dictator or any combination of options.
- Self-editing capabilities enable providers to finalize their own transcription so clinical information is instantly available to all caregivers.
- Dictated voice files are safely transmitted via toll-free data lines in real time, from any location.
- Extensive outsourcing resources are comprised of only the top-performing 15% of transcriptionists nationwide.
- We stand behind our work with fully auditable and transparent billing.

RESULTS

- Avoid the capital investment in HIM systems and software support costs.
- Meet or exceed productivity and financial goals.
- Accelerate billing cycles.
- Clients have documented productivity gains of up to 100% within three months and have seen cost savings of 30%-50%.
- Adoption of Automated Speech Recognition (ASR)-enhanced transcription services happen quickly and easily.
- Bypass the negative financial impact of the industry's chronic shortage of highly qualified transcriptionists.
- Completion of documents with 98% accuracy or above, with consistent, reliable turnaround time.
- Spark additional automation of the clinical workflow, including coding, CDI and clinical decision support with Precyse transcription output.
- ASR-enabled transcription is seamless to physicians and cost-effective.
- In the 2013 KLAS MTSO annual survey, Precyse earned the highest scores in the industry for the quality of our services and real problem resolution.

SUCCESS STORY

PRECYSE TRANSCRIPTION BEST IN KLAS IN 2012 AND 2013

One Precyse customer on the KLAS website stated, "I do not have any gaps or shortcomings with Precyse. I have been with them since 2006. My HIM department utilizes them as a full outsource service. I could not be more thrilled. Using Precyse was the best decision I made. They beat their contract term times by a mile. I don't have any quality complaints or upset doctors. Transcription is a nonissue."

ANNUAL KLAS MTSO SURVEY PRECYSE SERVICES HIGHLY PRAISED

Precyse's Transcription Technology and Services drive exceptional electronic documentation that better supports the data challenges healthcare providers are facing today, such as ICD-10, Meaningful Use and Core Measures. "Precyse has been an excellent company to work and partner with. Their turnaround times, reporting and customer service are all excellent," wrote one customer on the KLAS website. "I recently had them help me develop an interface with our EMR vendor. They completed this project on time and within budget, and it is working flawlessly. Precyse is an excellent partner, and their customer service makes them my personal favorite."
